

name:

STUMPS

SKU:

SZ001-9

description:

This device is ideal for balance training.

terms of use:

dimensions (L x W x H):

450 x 300 x 60 cm

safety zone:

750 x 600 cm

technical specifications:

- The device consists of 29 wooden stumps \varnothing 33 mm
- Stumps are stuck in the ground at a depth of 0.7 m below the level of "0" without the use of concrete
- Stumps protrude from the earth at a height variable 0,2 - 0,6 m
- Coreless wood, impregnated surface
- Wood is FSC certified (Forest Stewardship Council) - comes from controlled cultivation, carried out in accordance with the global forests protection program

installation:

1. Determine with the investor (or his representative) the place of installation and clear the area.
2. Dig pits under the footings according to recommendations of the supplier and guidelines of the relevant standard, unless the specification is different.
3. Place the device in dug pits, re-level and pour the foundation (B25), re-level again.
4. When the concrete is bound (after minimum 24 hours, depends on weather conditions and time of year), check the stability of the device.
5. Clean up the area.
