

name:

MOVING BEAM

SKU:

SZ001-11

description:

It operates perfectly to concentration and sense of balance.

terms of use:

MAX
160kg

dimensions (L x W x H):

370 x 20 x 60 cm

safety zone:

670 x 320 cm

technical specifications:

- The device consists of two wooden posts connected together by a horizontal beam hung on chains
- Dimensions of a wooden beam 15 x 15 cm
- posts fixed in the ground for concrete foundations: 0.6 x 0.6 x 0.6 m
- Impregnated surface
- Wood is FSC certified (Forest Stewardship Council) - comes from controlled cultivation, carried out in accordance with the global forest protection program

installation:

1. Determine with the investor (or his representative) the place of installation and clear the area.
2. Dig pits under the footings according to recommendations of the supplier and guidelines of the relevant standard.
3. Place the device in dug pits, re-level and pour the foundation (B25), re-level again.
4. When the concrete is bound (after minimum 24 hours, depends on weather conditions and time of year), check the stability of the device.
5. Clean up the area.
